Christian group predicts the world will be 'annihilated' on Wednesday

Over a week after blood moon doomsday forecasts were proven wrong, eBible Fellowship leader Chris McCann says 'the world will pass away' on 7 October

[Latest: the apocalypse is still on, says Christian leader](#)

The blood moon on 27 September signaled to some the beginning of the apocalypse.

2011 Aug-Oct	Various	There were fears amongst the public that Comet Elenin travelling almost directly between Earth and the Sun would cause disturbances to the Earth's crust, causing massive earthquakes and tidal waves. Others predicted that Elenin would collide with Earth on October 16. Scientists tried to calm fears by stating that none of these events were possible.
2012 May 27	Ronald Weinland	Ronald Weinland stated that Jesus Christ would return and the world would end on this day.
2012 Jun 30	José Luis de Jesús	José Luis de Jesús predicted that the world's governments and economies would fail on this day, and that he and his followers would undergo a transformation that would allow them to fly and walk through walls.
2012 Dec 21	Various	The so-called Mayan apocalypse at the end of the 13th b'ak'tun . The Earth would be destroyed by an asteroid , Nibiru, or some other interplanetary object; an alien invasion ; or a supernova . Mayanist scholars stated that no extant classic Maya accounts forecast impending doom, and that the idea that the Long Count calendar ends in 2012 misrepresented Maya history and culture. ^{[89][90][91]} Scientists from NASA, along with expert archeologists, stated that none of those events were possible.
2013 Aug 23	Grigori Rasputin	Rasputin prophesied a storm where fire would destroy most life on land and Jesus Christ would come back to Earth to comfort those in distress.
2014 Apr - 2015 Sep	John Hagee and Mark Biltz	The so-called Blood Moon Prophecy , first predicted by Mark Blitz in 2008 and then by John Hagee in 2014. These Christian ministers claim that the tetrad in 2014 and 2015 may represent prophecies allegedly given in the Bible relating to the second coming of Jesus Christ.
2015 Oct 7	eBible Fellowship	Chris McCann and the eBible Fellowship group predicted the destruction of the universe on this date, which is 1600 days after Harold Camping 's date of 2011 May 21. He said that there was "a strong likelihood that this will happen" and "an unlikely possibility that it will not".

About the College

People from all over the world, of all ages and backgrounds, have been informed, inspired and encouraged to act, by our 25 years of transformative courses for sustainable living.

Schumacher College has an enviable reputation for cutting-edge learning. Our work is to inspire, challenge and question ourselves as co-inhabitants of the world, to ask the questions we all struggle to find answers to and to find sound knowledge, intuition and wonder in our search for solutions.

We bring together the leading thinkers, activists and practitioners internationally, to deliver a unique brand of small group learning experiences. This learning takes place in the classroom, the gardens, the kitchen – it is part of everything we do.

Here you will discover things about yourself, make deep friendships with students from around the world and like many alumni start a lifelong connection with the

"If you want a convincing account of just how deep the shift in our new axial age is and must be, look no further than this brilliant book by Charles Eisenstein, one of the deepest integrative thinkers active today."

Sacred Economics with Charles Eisenstein - A Short Film

*"We've all been given a gift, the gift of life.
What we do with our lives is our gift back."*

- Edo

About the Book

Sacred Economics traces the history of money from ancient gift economies to modern capitalism, revealing how the money system has contributed to alienation, competition, and scarcity, destroyed community, and necessitated endless growth.

Today, these trends have reached their extreme - but in the wake of their collapse, we may find great opportunity to transition to a more connected, ecological, and sustainable way of being.

The More Beautiful World Our Hearts Know Is Possible

In a time of social and ecological crisis, what can we as individuals do to make the world a better place? This inspirational and thought-provoking book serves as an empowering antidote to the cynicism, frustration, paralysis, and overwhelm so many of us are feeling, replacing it with a grounding reminder of what's true: we are all connected, and our small, personal choices bear unsuspected transformational power. By fully embracing and practicing this principle of interconnectedness—called interbeing—we become more effective agents of change and have a stronger positive influence on the world.

Throughout the book, Eisenstein relates real-life stories showing how small, individual acts of courage, kindness, and self-trust can change our culture's guiding narrative of separation, which, he shows, has generated the present planetary crisis. He brings to conscious awareness a deep wisdom we all innately know: until we get our selves in order, any action we take—no matter how good our intentions—will ultimately be wrongheaded and wronghearted. Above all, Eisenstein invites us to embrace a radically different understanding of cause and effect, sounding a clarion call to surrender our old worldview of separation, so that we can finally create the more beautiful world our hearts know is possible.

¿cómo llegamos a este punto?

- Realidad única
- Dualidad Mente-Cuerpo
- Separación. Existencia del Individuo-Yo
- Necesidad de mercados. Economía.
- Existe una verdad, y la ciencia es la única manera de acceder a ella.
- Existe un mundo objetivo. Realidad unica.
